## RESEARCH AREAS

My research area is cyber-physical system security, with a particular interest in sensing. Most of my research focus on the trustworthiness of signals that transfer from the physical world to analog and digital systems. The systems that I have analyzed and/or enhanced include sensors, personal devices such as smartphones, autonomous vehicles, IoT devices, medical devices, voice assistants, voice biometrics, etc. My research also includes biometrics, device fingerprinting, side channel, covert channel, machine learning security, and acoustics.
